Contents Volume 75

Contents

Special Issue: Software Engineering Education and Training
Editorial
P. Knoke, A.M. Moreno and M. Ryan 1

An experimental card game for teaching software engineering processes
A. Baker, E. Oh Navarro and A. van der Hoek 3

Engineering-based processes and agile methodologies for software development: a comparative case study
É. Germain and P.N. Robillard 17

An industry/university collaboration to upgrade software engineering knowledge and skills in industry
D. Carrington, P. Strooper, S. Newby and T. Stevenson 29

The role of modelling in the software engineering curriculum
A.J. Cowling 41

The SEI curriculum modules and their influence: Norm Gibbs' legacy to software engineering education
D. Budgen and J.E. Tomayko 55

Regular Papers
Secure key agreement protocols for three-party against guessing attacks
H.-M. Sun, B.-C. Chen and T. Hwang 63

A practical pattern recovery approach based on both structural and behavioral analysis
H. Huang, S. Zhang, J. Cao and Y. Duan 69

Cryptanalysis of Xia–You group signature scheme
Z. Shao 89

Performance study on implementation of VCR functionality in staggered broadcast video-on-demand systems
W.-F. Poon, K.-T. Lo and J. Feng 95

Preventing information leakage within workflows that execute among competing organizations
S.-C. Chou, A.-F. Liu and C.-J. Wu 109

Secure agent computation: X.509 Proxy Certificates in a multi-lingual agent framework
S. Raghunathan, A.R. Mikler and C. Cozzolino 125

Wireless protocol testing and validation supported by formal methods. A hands-on report
M.J. Fernández-Iglesias, J.C. Burguillo-Rial, F.J. González-Castaño and M. Llamas-Nistal 139

A two-level scheduling method: an effective parallelizing technique for uniform nested loops on a DSP multiprocessor
Y.-H. Lee and C. Chen 155

Migratable sockets in cluster computing
K. Malik, O. Khan, T. Mobashir and M. Sarwar 171

doi:10.1016/S0164-1212(04)00175-X

An agent-based inter-application information flow control model
S.-C. Chou 179

Cryptanalysis of Hwang–Yang scheme for controlling access in large partially ordered hierarchies
S.-Y. Wang and C.-S. Laih 189

Enhancing Service Location Protocol for efficiency, scalability and advanced discovery
W. Zhao and H. Schulzrinne 193

Revocation of privacy-enhanced public-key certificates
N. Zhang, Q. Shi and M. Merabti 205

J2EE support for wireless services
S. Zeadally and J. Pan 215

A generic anti-spyware solution by access control list at kernel level
S.S.M. Chow, L.C.K. Hui, S.M. Yiu, K.P. Chow and R.W.C. Lui 227

Special Issue: Adaptive multimedia computing
Adaptive multimedia computing
S. Guan and R. Lai 235

Streaming video delivery over Internet with adaptive end-to-end QoS
E. Kusmierek and D.H.C. Du 237

Adaptive video transcoding and streaming over wireless channels
Z. Lei and N.D. Georganas 253

An adaptive rate-control streaming mechanism with optimal buffer utilization
S.-C. Chen, M.-L. Shyu, I. Gray and H. Luo 271

ATF: an Adaptive Three-layer Framework for inter-stream synchronization of SMIL multimedia presentations
I.-C. Chang and S.-W. Hsieh 283

An agent based adaptive bandwidth allocation scheme for multimedia applications
S.S. Manvi and P. Venkataram 305

Scheduling legacy multimedia applications
X. Liu and S. Goddard 319
